# QUICKCLOSE CORE Library update for PC Emulator

## Instructions for updating Quickclose Core

1. On the HP49 emulator, press **[VAR]**
2. Press the **|DELB|** menu key
3. At the ***"Remove CORE Library? (Data is saved)"*** prompt, press **|YES|**
4. If the PLUS library is also installed, press NO at the "Remove PLUS Library?" prompt.
5. Click [Left-Shift] [VAR] on the emulator to get to the HOME directory
6. On the HP49 emulator window, click on Edit, Load Object
7. Ignore the memory lost warning that is displayed
8. Click on QC3NEW.LIB (from the folder where the update is downloaded)
9. On the emulator, press [Right-shift] [EQW]
10. Click [ALPHA] [ALPHA] to set alpha mode
11. Click on the alpha keys to type QC3NEW.LIB
12. Press [ALPHA] to get out of alpha mode
13. Press [STO]
14. On the emulator press the **|QCLOS|** menu key (press the VAR key first if it is not displayed)
15. Press **[NXT]**
16. Press the **|RELOD|** menu key
17. Press **|RUN|** to run the updated CORE program. All data, settings and activation codes are preserved.
